

# Additional services

## Cargo Survey

In various ports we can offer a cargo and shipping survey for a reasonable fee. In case you need someone to look at equipment for damages or if all items are on site we can help. We can offer this service in the ports of [Alexandria](#), [Amsterdam](#), [Antwerp](#), [Dubai](#), [Jebel-Ali](#), [Moerdijk](#), [Rotterdam](#), [Vlissingen](#), [Zeebrugge](#) and [Sharjah](#).

## Spare Parts Sourcing

If you need spare parts for machines of Komatsu, Caterpillar or other brands we might be able to help. It is not our core business but as we are long time in business we have some connections.

## Spare Parts Catalogues

We have many spare parts [catalogues on stock](#) for Caterpillar and Volvo machines.

## Inspections on Machinery Auctions

Often we have engineers available on auction sites of Ritchie Bros. or Euroauctions. Our inspectors travel frequently to [Dubai](#), Moerdijk, Valencia, Ocana, Dormagen and Leeds for inspections.

## Equipment Consultancy

Depending on the solution required, MEVAS is able to consult how to use machines, which machine would be suitable and what size should be used. If the requirement is just a technical advise or even the workflow estimation for a mine - we have the capability to do it. Let our team of specialists help you to select the right machine for your needs.

## Machinery Sales and Sourcing

MEVAS is not involved in machinery sales. To remain independent we stay apart from the trading business. To help you in finding the machines you need we have created a website with a [listing of machine sources](#). There you can find all kinds of heavy equipment. After you selected the equipment we can advise if we know the seller, if we think it would be a reasonable deal and last but not least, we can offer the inspection of selected items.
