2. Valuation of Construction Equipment
3. Pre Shipment Inspections (PSI)
4. Capacity and Coverage
5. Damage Analysis Construction Equipment
6. Quarantine Cleaning Control for Australia (AQIS)
7. Reference customers and projects

### 1. Inspection of Used Machinery, Statement of Condition

A network of engineers is ready to inspect the condition of used heavy machinery in Europe for you. Experienced machinery inspectors are available in various countries to assess the condition of used construction machinery. Whether you're a buyer, contractor, financial institution or rental company. Gain an independent perspective on your potential investment with pre-delivery or pre-shipment inspections. Our experts conduct thorough assessments, highlighting any issues and empowering you to make informed decisions without travel. For buyers navigating machinery auctions, take advantage of our exclusive Quick Inspections package, offering competitive rates for comprehensive evaluations.

### 2. Valuation of Construction Equipment

In certain scenarios, such as company sales, mergers and acquisitions or restructuring, the valuation of machinery and construction equipment by a third party becomes indispensable. Similarly, in legal disputes, rental discrepancies, or instances of machine damage, an unbiased appraisal by third-party experts is essential. With our flexible structure, we're equipped to appraise and assess everything from individual machines to extensive fleets. What sets us apart is our commitment to accuracy and reliability, ensuring our inspections and valuations are accepted, whether in tax offices or courtrooms.

### 3. Pre Shipment Inspections

When importing machinery from Europe, a pre-shipment inspection (PSI) by Mevas ensures quality, compliance and risk minimisation. Our inspections verify the machinery's condition, saving costs and ensuring peace of mind. Trust Mevas for a thorough inspection, safeguarding your investment and ensuring a smooth importation process. In addition to used machines, we also offer the inspection of new machines.

### 4. Capacity and Coverage

With our international team of inspectors, we are able to inspect heavy equipment in most of Europe as well as some other countries worldwide in a reasonable time frame and at a fair inspection fee. We work with 17 engineers on a permanent contract and another 31 support us occasionally. All inspectors are trained for the respective purposes and have a technical eye for used equipment.

5. Damage Analysis Construction Equipment

Facing disputes over a damaged construction machine? Uncertain about the cause—whether it's operator error, material defect or incorrect spare parts? Look no further than Mevas for reliable, independent damage analysis services. Our team of expert inspectors specializes in uncovering the truth behind machine damage. Whether it's an excavator, bulldozer, or any other equipment we provide impartial assessments to resolve disputes and provide clarity for reliable expertise at a competitive fee.

6. Quarantine Cleaning Control for Australia (AQIS)

Ensure your heavy machinery meets Australian biosecurity standards with our expert inspections. Our trained inspectors certify cleanliness to guarantee smooth import processes. Don't risk delays - trust Mevas for AQIS quarantine checks before delivery. Available in Germany and select ports in Belgium and the Netherlands.

7. Reference customers and projects

Mevas is acknowledged service provider for some larger contractors and dealers of construction and mining machinery. We work for Caterpillar Financial, various CAT dealers such as PON-Equipment, Zeppelin International, Zeppelin Baumaschinen, CGT and Finanzauto. Among the contractors we serve are Mibrag GermanyEurovia, Mateco, Ritchie Bros. auctioneers and some other major companies.

Mevas has done larger appraisal projects for companies such as SUEZ, SERSA Germany, ESA space-centre in French Guyana and some more. In 2023 we inspected a fleet of underground mining machines in Bosnia and an entire fleet of lifting equipment in Senegal. Our team also tested 92 mobile cranes and crawler cranes for buyers from all over the world.
