## Equipment Valuation Nr. 1958

Dear Shandor Talib,

Thank you for your inquiry to value a used construction machine. Below you can find our expert opinion about the residual value for a machine with the data we received.

A purchase price in the market would be approximately 15% above the given value.

Make / Type	Caterpillar 315F
Type of Equipment	Tracked Excavator
Build Year	2018
Serial No.	TDY20215
Working Hours at Valuation Date	3949
New Machine Price	159.000 €
Configuration	Variable boom, stabilizer blade
Attachments	Grading bucket 2.00m, adjustable
Residual Value at Valuation Date	68.000 €

The undersigned has determined the value of the machine to the best of his knowledge and belief. Factors that influenced this were the age, the number of operating hours, the type of machine and the current situation on the used machine market. The new price and the question of whether the machine still had a factory guarantee also had an influence.

Wolfgang Bühn
